- Dataset1
  - The dataset was easily accessible and store on my local machine
  - Pre processing of the data was easy because it was in a CSV format
  - exploring the data as well was also easy , because i don't need to do any data conversion or looking for the desire libraries for the conversion
  - reading datset with pandas libraries was pretty straight forward
- - Dataset2
  - The dataset was easily accessible and store on my local machine
  - Pre processing of the data was easy because it was in a CSV format
  - exploring the data as well was also easy , because i don't need to do any data conversion or looking for the desire libraries for the conversion
  - reading datset with pandas libraries was pretty straight forward

 - - Dataset3
  - The dataset was easily accessible and store on my local machine
  - Pre processing of the data was easy because it was in a CSV format
  - exploring the data as well was also easy , because i don't need to do any data conversion or looking for the desire libraries for the conversion
  - reading datset with pandas libraries was pretty straight forward
